graph TD
    Start([break-in of a burglar  
sound of a burglar]) -- I/O --> D1{whether a burglar breaks  
in or there is a sound of a  
burglar is judged}
    D1 -- No --> E1[the images stored in the  
three files Image(1),  
Image(2), and Image(3)  
are examined by technicians]
    E1 --> P1[the three files  
Image(1), Image(2), and  
Image(3) are cleared]
    P1 -- 1 --> D1
    D1 -- Yes --> P2[a plurality of photographing  
devices start to capture images  
and store the images into  
the file Image(3)]
    P2 -- 2 --> D2{whether the burglar  
escapes or the sound of the  
burglar disappears  
is judged}
    D2 -- Yes --> P3[the status of an  
image-capturing system  
is maintained and the  
process is stopped]
    D2 -- No --> D3{the process of  
capturing images is continued  
and whether the burglar escapes  
or the sound of the burglar  
disappears is judged}
    D3 -- No --> E2((2))
    E2 --> D2
    D3 -- Yes --> P4[the file Image(1) is stored  
as the file Image(2), the  
file Image(3) is stored as  
the file Image(2), and the  
file Image(3) is cleared]
    P4 -- 1 --> D1
